LocalSeek app: hybrid BM25 + dense search, on the phone, no network
Study 1: retrieval quality on real phones
1A: owner's phone (confirmatory, pre-registered) 95 queries, 9 configurations
1B: users' phones (exploratory) 11 volunteers, 3 methods, blind judging
Study 2: speed and cost (descriptive) 2 test phones + 11 users' phones
Study 3: public data (exploratory) Python port, 5 BEIR datasets, 5 embedders
Shipped in version 1.0.0: hybrid RRF, exact dense search (binary shortlist above 25k chunks), no reranker
